

Données

Health expenditure and financing

Frequency of observation: Annual

Measure: Expenditure

Time period: 2025

Combined unit of measure: Euros per person, PPP converted, Current prices

Pays	Dépenses de santé par
Australia	5 041,8
Austria	5 604,4
Belgium	5 120,1
Canada	4 631,7
Chile	2 526,9
Colombia	1 288,5
Costa Rica	1 362,4
Czechia	3 463,0
Denmark	4 677,2
Estonia	2 503,9
Finland	4 180,8
France	4 641,6
Germany	6 242,1
Greece	2 346,3
Hungary	2 090,8
Iceland	4 402,9
Ireland	5 112,0
Israel	2 656,0
Italy	3 292,7
Japan	3 623,8
Korea	3 259,2
Latvia	2 446,4
Lithuania	2 734,6
Luxembourg	5 237,3
Mexico	1 036,5
Netherlands	5 532,3
New Zealand	3 737,8
Norway	5 679,6
Poland	3 163,7
Portugal	3 476,4
Slovak Republic	2 506,2
Slovenia	3 510,9
Spain	3 338,9
Sweden	4 825,0
Switzerland	6 562,1
Türkiye	1 477,9
United Kingdom	4 521,7
United States	9 776,5

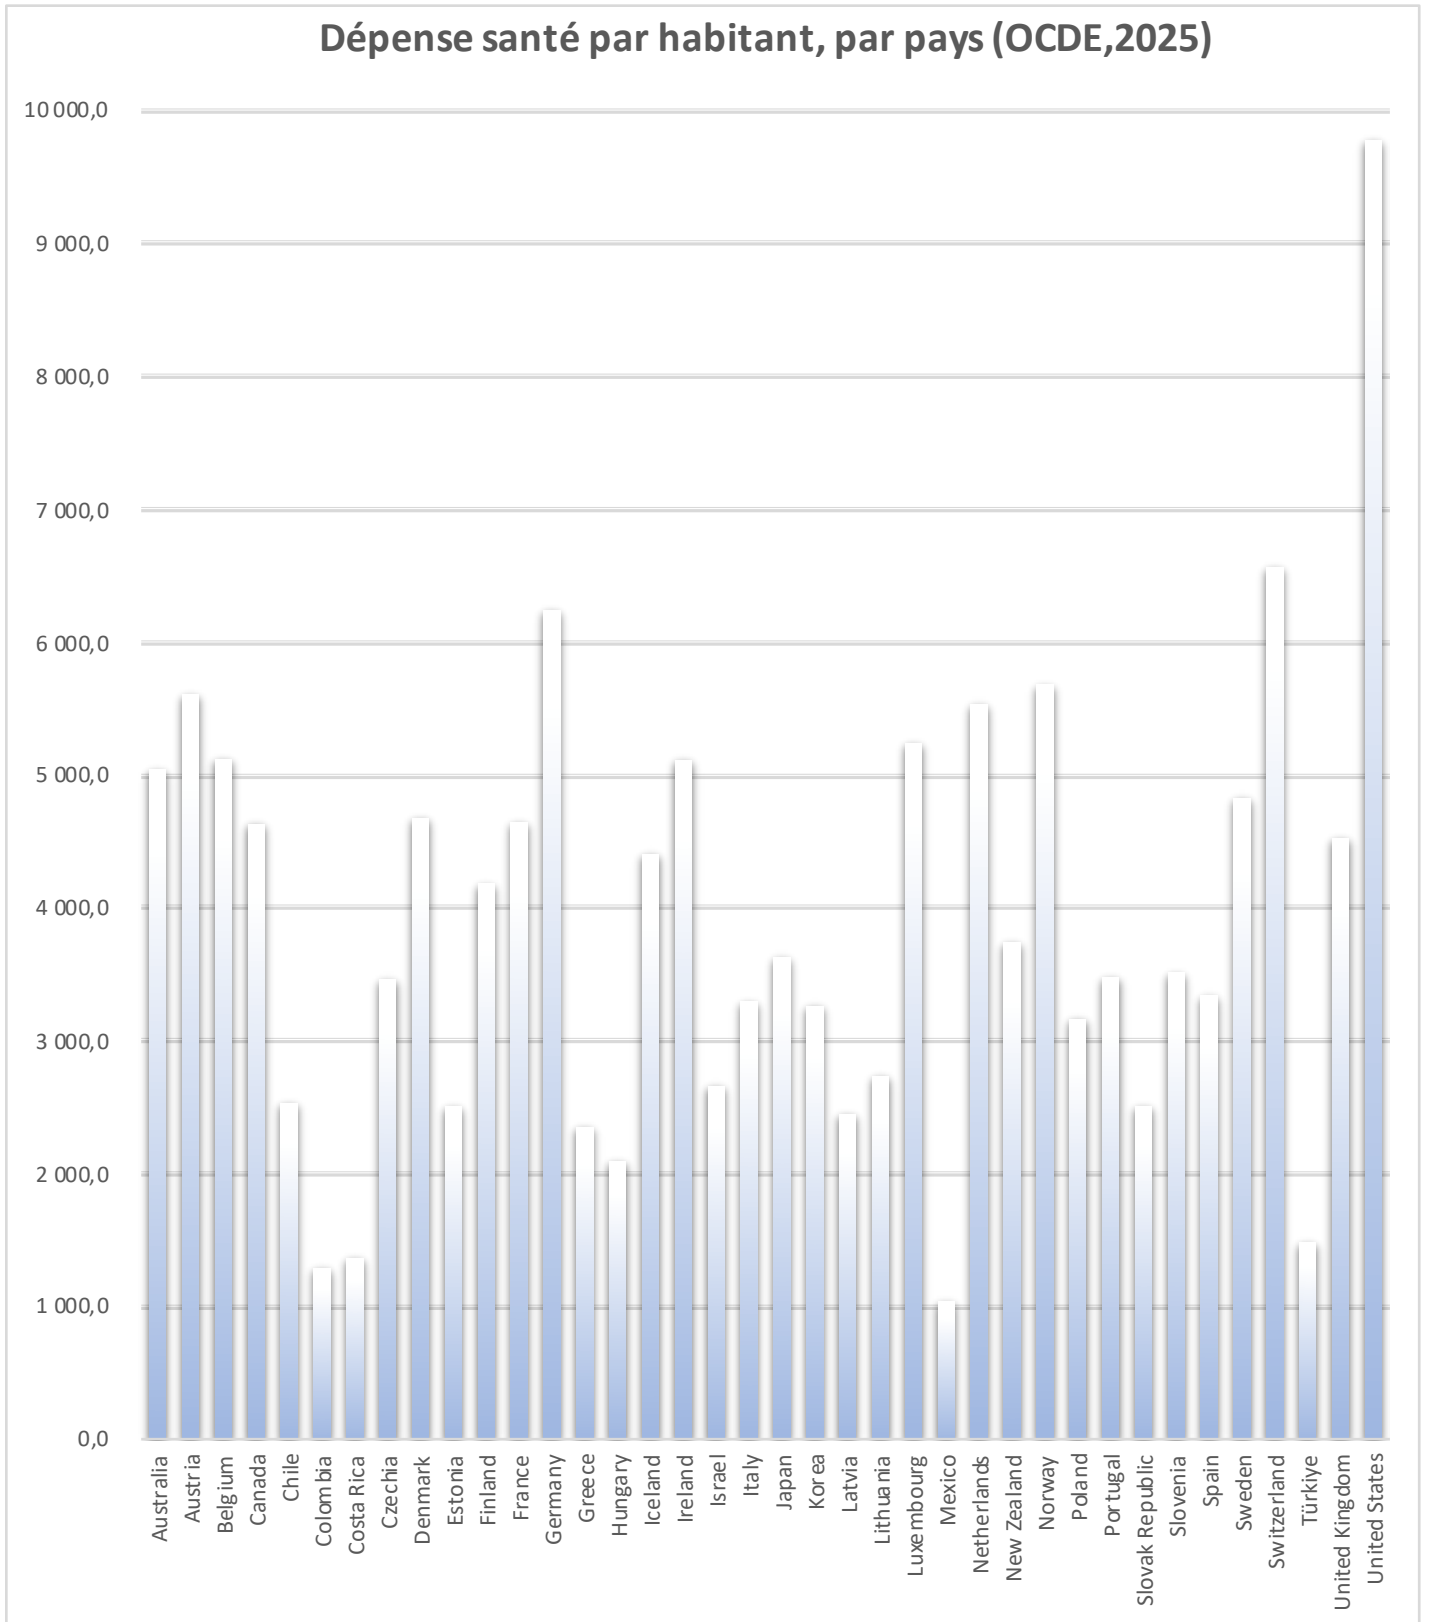

Statistiques descriptives

N	38	Moyenne > Mediane = asymétrie à droite
Moyenne	3885,05	
Médiane	3567,36	
Mode	0,00	mode pas pertinent pour variable continue
Ecart-Type	1733,73	forte dispersion
Variance	3005808	
Min	1036,55	
Max	9776,46	
Etendue	8739,91	
Cv°	0,45	
Q1	2559,21	
Q2	3567,36	
Q3	4987,61	
Asymetrie	0,91	confirme l'asymetrie à droite. Celle-ci est modérée.
Applatisseme	2,18	distribution pointue, Leptokurtique
IQR	2428,40	confirme la dispersion au centre de la distribtuioon et suggere presence d'outliers qui font gonfler la variance et ecart-type
Borne basse (outlier)	-1083,39	
Borne haute (outlier)	8630,215	USA, seul pays dans la borne haute. Il tire la moyenne vers le haut.

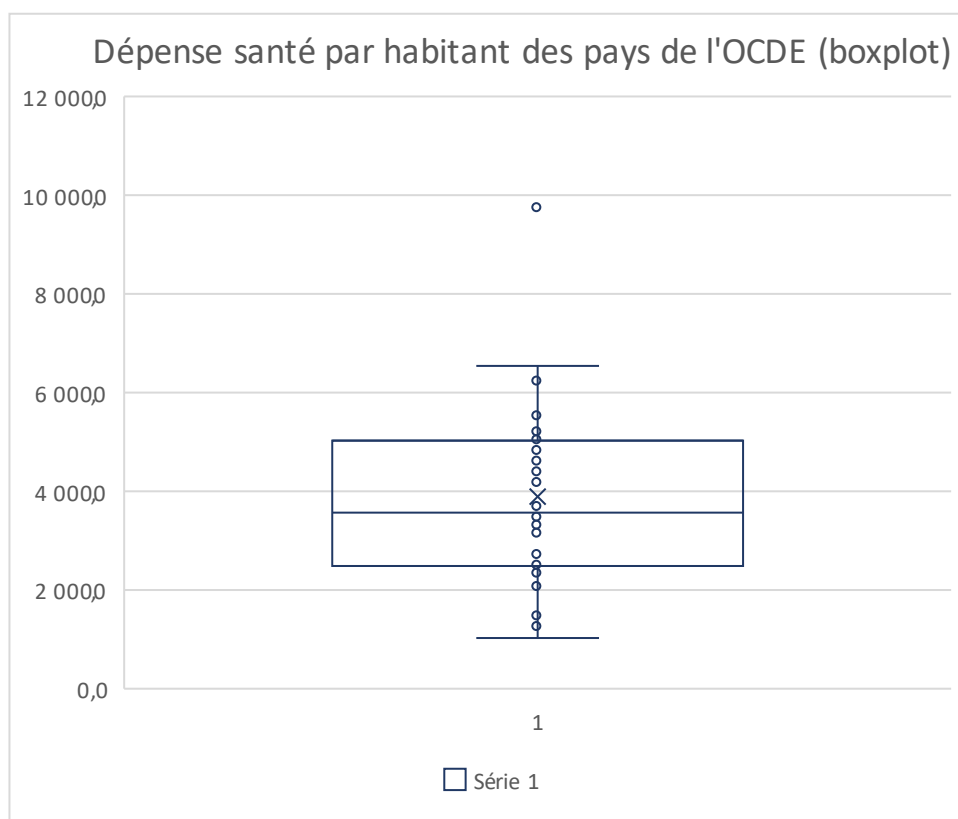

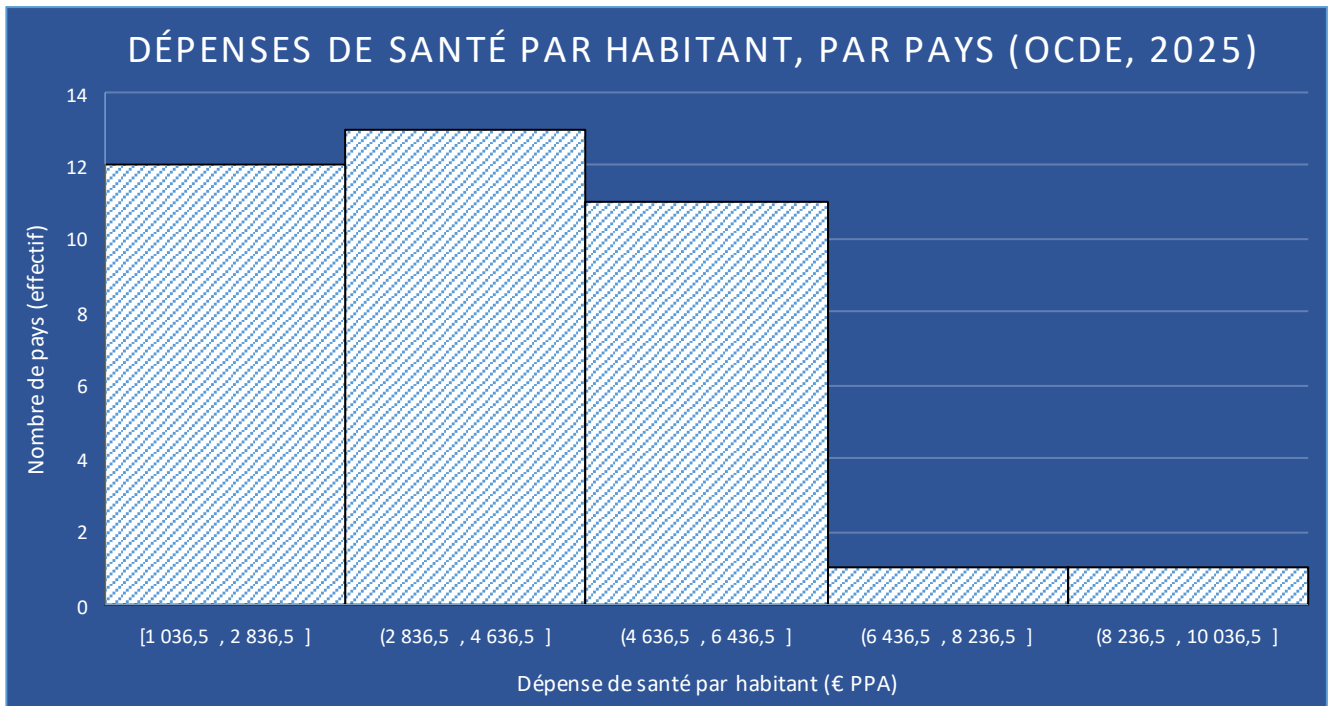

Interprétation

La distribution des dépenses de santé par habitant dans les pays de l'OCDE est asymétrique à droite (skewness = 0,91). La moyenne (3 885 €) est supérieure à la médiane (3 567€), signe que quelques valeurs élevées tirent la moyenne vers le haut. L'histogramme confirme cette lecture : 36 des 38 pays se concentrent entre 1 000 et 6 400 €, tandis que les États-Unis (9 776,5 €) se situe très au-dessus, à plus de 3 000 € du deuxième pays le plus dépensier (Suisse, 6 562€). Le kurtosis élevé (2,18) témoigne d'une distribution concentrée autour du centre, mais avec une queue lourde causée par cette valeur extrême.

Health expenditure and financing

[A System of Health Accounts](https://www.oecd.org/content/dam/oecd/en/publications/reports/2017/03/a-system-of-health-accounts-2011_g1g75c9d/9789264270985-en.pdf) provides an updated and systematic description of the financial flows related to the consumption of healthcare goods and services. As demands for information increase and more countries implement and institutionalise health accounts according to the system, the data produced are expected to be more comparable, more detailed and more policy relevant. It builds on the original OECD Manual, published in 2000 to create a single global framework for producing health expenditure accounts that can help track resource flows from sources to uses. It is the result of a collaborative effort between the OECD, WHO and the European Commission, and sets out in more detail the boundaries, the definitions and the concepts – responding to healthcare systems around the globe – from the simplest to the more complicated. The accounting framework is organised around a tri-axial system for the recording of healthcare expenditure, namely classifications of the functions of healthcare (ICHA-HC), healthcare provision (ICHA-HP), and financing
